

Get Ready to Work

Get Ready to Work! is a focused career discovery program where participants get to choose one-of-twelve careers and spend 20 weeks engaging in it.

Participants zero-in on a specific industry and learn directly from professionals in a relevant work-place environment.

Get Ready to Work! is for enthusiastic grade-nine students who are looking to deepen their self-understanding and career knowledge. Participants spend two-to-four hours each week from October to May learning about their career choice.

Class sizes are small so students have ample opportunity for one-on-one direction with the instructor.

Take charge of your future today, and Get Ready for Work!

Commitment

Students are expected to have great attendance, engage in lessons, and contribute to a positive learning environment.

Students are responsible for arranging their own transportation to and from project venues.

We Would Like To Thank!

CHOOSE *Your* ADVENTURE

GET READY TO WORK! PROGRAM

Choose Your Adventure

Prepare For Lift Off!

Aerospace Technology

Check out the high-tech high security world of global aerospace technology. In partnership with a medley of aerospace companies, participants will work with the most modern and up-to-date technology that the industry has to offer.

This Just In

Broadcast Journalism

Learn how to conduct interviews, write news stories, shoot footage, and record for television or radio. Participants use a professional television studio, radio training facilities, and video/audio editing suites.

From the Ground Up

Construction

Learn how to design and build your own house. Try your hand at framing, wiring, roofing, interior finishing, and so much more.

What's Cooking?

Culinary Arts and Baking

Flex your creative muscles in the kitchen as you learn all the steps necessary to create a meal worthy

of Winnipeg's finest restaurants.

Solve a World of Problems

Engineering

Design, develop, and test the Engineering career path. Experience different types of engineering by tackling problems and finding solutions – from the design right to the build.

Rock On

Geological Science

Uncover the hidden treasures in the earth. Learn how geologists find resources that we utilize on a day-to-day basis.

Not Just Business as Usual

Non-Profit Business Management

Discover the world of not-for-profit organizations. See how they are run, create your own, and plan an event to develop resources for a good cause. Learn about an exciting career path that can make a big difference.

Strike A Pose

Photography and Graphic Design

Focus your creative eye the way only a photographer can and catch amazing shots. Using your own photos, create personalized calendars, photo books, and other graphic products.

High-Tech Healing

Radiation Therapy

Explore how cancer grows in the body and how it is diagnosed and treated. Learn about the duties of radiation technologists at CancerCare Manitoba (Health Sciences Centre) and how they use cutting

edge technology to do their jobs.

Fade Music, Cue Commercial

Radio Broadcast Production

Learn what goes on behind the scenes at KICK Online and try your hand at everything from writing commercials and show scripts to developing and executing promotions.

Community Development Starts with You

Social Work and Social Justice

Develop the skills and abilities to help individuals and communities. This project provides opportunities to learn how to conduct community needs assessments and develop recommendations that will help the community and its members.

You're Going to Be a Star

Theatre

Experience live stage performances and learn the skills Hollywood actors honed before hitting the big screen. Get a behind-the-scene look at what's involved in writing and casting a play, designing a set, and organizing a dress rehearsal.

Note: Not all projects have been confirmed. A complete list of projects will be available at the orientation.
